OFFICE, 25 & 27 Fourteenth St.

THURSDAY, NOV. 20, 1873. Annual Meeting of the Stockholders of the Baltimore & Ohio Railroad "The Exhibit for the Last Fiscal

Year. The annual meeting of this Company was held on Monday last, in Baltimore. The old Board was, of course, re-elected. There were 39,226 shares of stock repre sented at the meeting. The earnings and expenses of the several divisions of the

road were as follows:

Main Stem, including the Wincaester & Potomasc the Washington County, and Wilschester and Strasburg Stanches and the Metropolitan Branch Road, \$12,225,845.78 \$7,815,888 15 Washingt's Franch. \$43,141.69 156,713. \$12,162.64 Parker's Branch. \$43,141.69 156,713. \$13,1427.64 Countal ohio Livis in 1,055,417.58 1.27 Moseling, Pittaburg & Bailmore Hailroad. 47,364.79 46,004.61

126,491.03 . . \$15,690,141 54 \$10,187,952 64

The net revenue of the Main Stem and Lake Erie Divisions, the Wheeling, Pittsburgh & Baltimore, and Newark, Somer-

senger cars, and 2,256 cars for genera tonnage, were purchased and built at the Company's works. The cost of the new and additional equipment, \$2,685,428.75 has been charged to rolling power.

On the Main Stem the earnings, in comparison with the fiscal year 1872, have increased \$1,598,372 16, and the working expenses \$1,191,482 22, making a comparative increase in the net profits of \$406,889 94. Compared with the fiscal year 1871, the increase of earnings being \$2,839,458 29, and of working expenses \$1,496,994 47, the increase of net profits nounts to \$932,458 82.

Semi-annual dividends of five per cen

Semi-annual dividends of five per cent upon the capital stock were paid on the 1st of November, 1872, and on the 1st of May, 1873, respectively.

The liabilities of the Company, compared with the statement of September 80th, 1872, shows the following reduction, viz. By the payment of the remainder of the second mortrage bonds of the Northwater by the payment of the reinstoned the second mortgage bonds of the North western Virginia Railroad Company (now the Parkersburg Branch Railroad Company), which were guaranteed by the Baltimore & Ohio Railroad Company and which matured January the original sum having been \$1,000,000-\$453,500 00.
The liabilities also show the following

increase, viz : Preferred stock, second series, 6 per cent currency.

\$8,247,100 (0)
The profit and loss account shows an increase for the past year of \$2,882, 184 85.

It will be seen by this account that the

surplus fund, which represents capital derived from earnings invested in the various branches and connecting roads, and the great improvements that have been continuously constructed on the main line. and which is not represented by stock or

and which is not represented by stock or bonds, now amounts to \$29,034,403 71.

METROPOLITAN BRANCH RAILROAD.

The Metropolitan Branch Road, from Point of Rocks to Washington, forty-two miles, was opened for traffic on 25th May last. The expenditures on this costly line have amounted to \$3,583,497 63; but, whilst the engineering is very bold and the fine masonry and bridges have been expensive, it affords an admirable, direct and effective line which must prove of constantly increasing value. The National Capital, by the completion of this work has, through the Marietta & Cincinnatiand Baltimore & Ohio Roads, a line from Cincinnati—that great centre of business of the Valley of Ohio—an hundred and twenty miles less in distance-than the line of the Pennsylvania Railroad by Harrisburg and the Baltimore & Potomac Road, and a line from Pittsburgh by the Pittsburgh Washington & Baltimore and the Metropolitan Roads, seventy-five miles less in distance than the route by the Pennsylvania, Northern Central and Baltimore servectors. less in distance than the route by the Pennsylvania, Northern Central and Bal-

The great through mall and passenger trains between Baltimore and the West now pass over the Metropolitan Branch Road, and in full view of the Capitol and the city of Washington. Under this system, the passengers by the Baltimore & Ohio Road avoid the curved portion of its line in the Valley of the Patapaco, and color the interesting senger by the direct enjoy the interesting scenery by this direct and beautiful route. The great facilities of the line from Point of Rocks to Balti-more are now used without interference from these trains for the heavy coal and other tonnage traffic of the company.

GENERAL JACKSON, OF PARKERSBURG General John J. Jackson, of Parkersburg, is to leave soon with his family for St. Augustine, Fla., to pass the winter We join the Parkersburg Times in wish ing him a sale journey and a pleasant so-journ in the South. For many years the General has been a sufferer in the flesh besides being partially deprived of his sight. And yet he is a man of such force of character and such industry and un usual ability that he has constantly mainsained an active influence in the community where he lives. If General Jackson had been more conciliatory and less imperative in his temperament in by-gone days he would have figured more con spicuously in the politics of both Virginia and West Virginia, for nature did more for him than for many of the widely known men of the two States. But we happen to know that this infirmity of temperament, as some people might esteem it, is not a source of regret to him by reaso of what it may have lost him in a political way, for he is a man who values his PHARMACEUTIST, independence and his convictions too highly for any such vain regrets. His old age, we doubt not, has been made all the more pleasant to himself and to others be cause of this disposition to be true to himself in all his professions and positions on public questions.

THE New York Bulletin intimates that very many railroads in the country will be compelled to forego the payment of the interest on their bonds which fall due on 50 Mest. the first of January next.

"SHRINKAGE."-There is much talk at present of "shrinkage of values." following table of comparative prices of certain stocks for September and Novem ber will give a pretty sharp idea of what the term signifies:

\$122,500,000
If a table could be complied showing the difference between all values in the country in September and November, the rould be startling. And yet there has not been any depreciation values at all. The property that was in the country on the 18th of Semptember is

PITTSBURGH COAL MINERS,-There is

no end of the coal mining difficulties up DOMPEIIat Pittsburgh. They have one on hand all the time. Now it is the rallroad miners. They retuse to acquiesee in the action of the Railroad Coal Producers Exchange reducing the cost of coal one cent per bushel to consumers, and fixing the price for mining at \$3 20 per hundred bushels to take effect on Monday last. The miners Branches, including the Central Ohio and met in convention last week, and determined not to work for less than \$3 60 per hundred. The operators decline to pay set & Straitsville Railroad, is thus shown a higher rate than that stipulated in the to be \$5,558,488 90. The aggregate working expenses were 64 58-100 per cent of for the present. As a consequence, the the whole gross revenues.

The increasing business of the Company continued to require large additions to its equipment. During the year of first class engines, 46 palace and pas-

RICE —Wednesday morning, November 19
1878, at 2 o'clock, of Typhold Fever at the residence of William H. Bavis, No. Si. Fifteenth street, Louis I Rices in the 18th year of his age.
The funeral will take place from the number above stated at 1½ o'clock F. M., Thursday, 80b.
The relatives and young comrades of the deceased are invited to attend without further notice.

SWARTZ .- On Wednesday, November 19th 1878, at 6 o'clock P. M., Mr. C. A. SWARTZ, in th in to morrow's papers.

CONSUMPTION.

A Disease of Terrible Fatality in this Climate.

tooms more to the grave than Smallpox, Yel to Ferer and Cholera combined. More than 100,000 persons the animality in this com-icy from this deadly malady, it stands at the very head of all the discussery this climate in prevalence and fatality.

FIRST STAGE OF CONSUMPTION. Physical Stens.—Duliness of sound on and nder the collar bones, shortened inspiration, xpiration increased both in duration and inten-

on and under the collar bones and extending below them, inspiratory nurmer lessened in duation and intensity, expiratory nurmer aumentation and intensity, expiratory nurmar aumentation and intensity, expiratory nurmar aumentation in the lower lobes, sounds of the heart heard under the collar bones, &c.

GHNNS-ALFYMFTOMS—Accelerated pulse, slight forer toward evening, great susceptibility to colds, bowels generally costive, eyes peculiarly white and lastrous, skin and mouth dry in the afternoof, chills about midday, followed by fever which fishes the cheeks, dry burning heat in the pains of the heads and soles of the feet, night sweats, emalation, &c. Cures more dimentant less frequent in this stage.

PRYSICAL STOKES—CAVILIES in the lungs, if

THIRD STAGE.

PHYSICAL Stevs.—Cavities in the lungs, it small the sounds are still deal, if large and near the surface the sounds are tympanitio, cavernous ratties, cavernous breating, cavernous cough, metalic tinking, exhaustion, &c.

Generata systemose circat loss of deah and strength, diarrhoes and night sweats, swelling of the feet and legs, sore lips and mouth, raising matter with species of tubercle like small crumbs of cheese, &c. Curse can never be effected in this stage.

OBSERVATIONS. OBSERVATIONS.

this stage.

OBSERVATIONS.

Tubercles in the majority of cases begin to form at the top of the longs. The pulmonary crumpling sound is caused by a mechanical obstruction to the expansion on the lungs. It is only teard during inspiration and sounds as if blowing on fine paper. The dullness of sound on percussing the cheet arises from the absence of air in the air cells, these being closed by the tubercuous deposit. Alt forcing through the mucons in the air tubes causes beables, the bursting of which produces the rattle Tho mucons are the second by the safe shall gradient to the tubercle. The dry repliant rattle is caused by infamation around the tubercle. The gradient is the sound of blowing through a tube lumered in the sound of blowing through a tube lumered in the sound of blowing through a tube lumered in the sound of blowing through a tube lumered in the sound of blowing through a tube lumered in the sound of blowing through a tube lumered in the sound of blowing through a tube lumered in the sound of blowing through a tube lumered in the sound of blowing through a tube lumered in the sound of blowing through a tube lumered in the sound of blowing through a tube lumered in the sound of blowing through a tube lumered in the lumered in the second blowing through a tube lumered in the second blowing through a substantial and the lumered in the lumered lumered
